FINANCE AND TRADE.

In financial markets summer dullness has well settled down. Occasional inquiries for money at four months are occurring; promissories of the rush for loans that is sure to come. Exchange quiet at buying and selling. Premiums on New York; discount buying and par selling on New Orleans. Gold keeps up, quoting in the evening 117 in New York. There is a fine time occasionally set for in the market.

There was some inquiry for money on Texas, Arkansas and other southern securities, such as State and county bonds and public improvements, but our St. Louis capitalists, not yet having full confidence in their character, generally refused to answer the demand.

The New York Shipping List thinks "everything appears to be shaping for a summer of quietness. But had it not been for the trade here, it is probably no worse than it is in Europe, judging from our regular reports, and what we learn from merchants who have recently returned there. It seems to have been proved by history that these commercial crises are repeatable about once in ten years. The one from which we are now suffering is probably the severest we have ever experienced. We had more than a decade of evil to be remedied—the suffering is consequently more severe and prolonged, and the recovery is therefore slower.

There is reason to believe, however, that the worst is over, and that affairs are destined to improve slowly, though we cannot hope to have the same activity, excitement and chances of speedy fortunes we had during the last decade. County bonds are in demand and are firm at that rate. City fire and police scrip is taken by brokers at 75 and state notes at 110. The market for 10 shares of Bluff City insurance company at 33.

The cotton market had another "black eye" yesterday. New York was so low and Liverpool was so high, that the market of the other markets also reflected lower fractions. In our market there was great depression, and the buyers showed great desire to sell; quotations could not be sustained, and purchases were made at 13 1/2 for good middling, 14 1/2 for low middling, 14 1/2 for middling, 15 1/2 for good middling. Among purchases at the latter price was cotton that was bought in May at 13 1/2. The expectation that it would bring 20c.

The closing telegrams were as follows: New York dull and lower, 15 1/2; sales, 402 bales; exports, 2500 bales. New Orleans quiet at 15 1/2; sales, 1000 bales; receipts, 87 bales. Liverpool easier at 15 1/2; sales, 1000 bales; receipts, 87 bales.

The market was dull, and in lower to sell; sales 600 bales, of which spinners took 50, exports 100 bales. The following were the changes in New York futures:
